

SUMMER at Sylvan

SMART FUN TODAY - SKILLS THEY NEED TOMORROW!

Keep your child's mind growing over the summer.

It's no wonder our summer camps are a favorite among kids. Our camps are designed to spark a child's mind—from our fun math "workouts" in Fit 4 Algebra, to our creative and unconventional projects in Writing Camp (such as writing movie reviews or website content). Don't miss out!

Read Ahead Camp (K-6)

A fun approach for your child to build early reading skills through fun, multisensory activities.

Fit4Algebra (6th-11th grade)

We get kids in tip-top shape for algebra, using an engaging mix of activities to ensure math muscles are strong and fit.

Writing Camp (4th-8th grade)

From writing movie reviews to crafting web copy, kids learn key techniques through creative writing projects.

Math Edge Camp (1st-8th grade)

Build the confidence and critical skills needed to master today's math and skills yet to come – all while having a blast!

Bot Lab (1st-6th grade)

Kids will learn to build and program amazing robots using LEGO bricks around themes such as Dino World and Superhero School.

Engineering Lab I & II (1st-7th grade)

Working in collaborative pairs, the kids will solve a design challenge with nothing but their imaginations, their LEGO supplies, and their newfound knowledge of how simple machines work.

Build A Bot (1st-7th grade)

Kids will create complex robots to learn engineering and problem solving. They will build sophisticated bots using LEGO bricks and award winning WeDo software. It is such a cool way to learn advanced problem solving and engineering skills!
